

# DSG CELEBRATES 15 YEARS OF INNOVATIVE LIFE SCIENCES' SOLUTIONS

*Malvern, PA, May 5, 2007—DSG, Inc. this month celebrated 15 years of serving the life sciences industry with innovative software and services. DSG supports clinical trial data collection globally through EDC, electronic patient diaries, Clinical Trial Management, Data Management and SAE Reporting software and solutions.*

*"We are proud of our success and privileged to have provided clinical software, services and innovative technology solutions to the life sciences industry throughout our 15 year history," stated Tony Varano, founder and CEO of DSG, Inc. He continued, "DSG has successfully supported more than 400 clinical trials at 18,000 sites for 100 EDC clients in over 43 countries worldwide."*

*Recent DSG milestones include:*

- *Record growth and more than doubled revenue in 2006 in all areas of business*
- *Addition of more than 25 new EDC customers last year*
- *The release of multi-language eCaseLink capabilities*
- *Major inroads and partnerships in the Japanese and Chinese markets*
- *Dismissal of an industry sensitive patent lawsuit*
- *CTMS and EDC product integration matures in its second year*
- *Beta testing our newest eCaseLink product based on Microsoft's .Net 3.0 framework*
- *Establishment of a new Data Management Division within DSG to provide strategic clinical data management services to customers*
- *Introduction of On-Demand Data Exporting*

---

*DSG, Inc. has been supporting clinical trial data collection with innovative technology solutions including EDC, electronic patient diaries and digital on-demand CRF publishing management software since 1992. DSG's products allow user-friendly, accurate and efficient data capture at any investigator site regardless of the site's technological infrastructure. DSG has successfully supported more than 400 clinical trials at 18,000 sites for 100 EDC clients in more than 43 countries worldwide.*
